## Metals Deformation Processes: Fundamental and Applications

Guest Editors:

### Dr. Jiangkun Fan

State Key Laboratory of  
Solidification Processing,  
Northwestern Polytechnical  
University, Xi'an, China

### Dr. Shun Xu

National Key Laboratory of  
Science and Technology on  
Materials under Shock and  
Impact, School of Materials  
Science and Engineering, Beijing  
Institute of Technology, Beijing,  
China

### Dr. Cai Chen

Sino-French Engineer School,  
Nanjing University of Science and  
Technology, Nanjing, China

Deadline for manuscript  
submissions:

**closed (20 February 2023)**

### Message from the Guest Editors

Metal deformation is one of the most prevalent research topics in materials science. Controlling a metal material through a specific deformation process can allow it to exhibit the expected service performance and design configuration. The application of metal materials and their components has played an extremely important role in the development of human society and civilization in the past. In the future, it still plays an irreplaceable role in the sustainable development of social civilization. Optimizing on the basis of traditional materials and their deformation methods, or developing new metal materials and deformation processes, is crucial to social development.

Therefore, the content of this Special Issue "Metals Deformation Processes: Fundamental and Applications" not only focuses on traditional metal structural materials, but also on some new metal materials (such as superalloys, high-entropy alloys, etc.), as well as theoretical and applied studies on the deformation behavior of the above-mentioned materials.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
