Message from the Guest Editors

Metal oxide materials have been very important for various applications for many decades. Particularly, during the last two decades, research on different aspects of nanomaterials and nanocomposites of metal oxides has been very active. The nanocomposites of metal oxides, including inorganic and organic hybrids for electronics, and electrochemical energy conversion applications, are highly investigated. Therefore, this Special Issue is focused on a broad readership and audience for easy access to the current progress in these active nanomaterials for diverse applications. Importantly, metal oxide nanostructures used in the development of sensitive and selective biosensors, as well as future directions in this field, will be encouraged. Critical review articles and excellent research findings from experts and scientists in the field of metal oxide nanostructures used in the field of solid state electronics and sensor technology are highly welcome in this Special Issue of *Materials*. This is not an exhaustive list of topics, and interesting research articles related to metal oxide synthesis, characterization and new applications will also be covered in this Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

Professor of Biomedical Engineering, Professor of Bioengineering, Professor of Experimental Surgery, Associate Dean—Research and Graduate Studies, Department of Biomedical Engineering, Faculty of Medicine/Faculty of Dentistry, Duff Medical Science Building, Room 313, 3775 University Street, Montreal, QC, H3A 2B4, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

Materials provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex and other databases. Citations available in PubMed, full-text archived in PubMed Central.

CiteScore (2018 Scopus data): **3.26**, which equals rank 97/439 (Q1) in 'General Materials Science'.
