New Horizon of Plasmonics and Metamaterials

Message from the Guest Editors

Plasmonics and metamaterials are growing fields that consistently produce new technologies for controlling electromagnetic waves. Many important results in both fundamental science and applications are being addressed for a wide range of materials, structures, and wavelengths from the ultraviolet to the microwave. For instance, these fields have recently expanded to tackle research on graphene and other 2D materials, flat photonics, thermal control, and mechanical structures.

This Special Issue aims to introduce recent advances in plasmonics and metamaterials, as well as their applications, for a wide range of topics in order to explore the new horizon emerging for these fields. We hope that this Special Issue will inspire researchers to break new ground.

Keywords

- plasmonics
- metamaterials
- metasurfaces
- thermal control
- applications
**Message from the Editor-in-Chief**

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

*Materials* provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

**Author Benefits**

- **Open Access**: free for readers, with article processing charges (APC) paid by authors or their institutions.
- **High visibility**: indexed by the Science Citation Index Expanded (Web of Science), *Ei Compendex* and other databases. Citations available in PubMed, full-text archived in PubMed Central.
- **CiteScore** (2018 Scopus data): **3.26**, which equals rank 97/439 (Q1) in 'General Materials Science'.
