Message from the Guest Editor

This Special Issue aims to give a brief overview of the current state of the development of the nanostructured materials (semiconductors, metal oxides, and composite thin films) for use in photovoltaic conversion and gas sensors. This includes active and passive elements of solar cells and sensors, with an emphasis on properties of nano-structural materials, methods of deposition, and characterization concerning their specific roles in the final device. The expected contributions should cover a broad field of research, from theory, experiment, specific characterization methods, material properties related to specific structures, core-shell particles, alloys, thin films, and multi-layers, to device properties and perspectives.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty comprehensive topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials, smart materials, thin films and interfaces, catalytic materials and carbon materials, materials chemistry, materials physics, optics and photonics, corrosion and materials degradation, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics, metals and alloys, general. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compindex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and many other databases.

Journal Rank: JCR - Q1 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
