Tribology: Recent State and Trends of Development

Message from the Guest Editors

Tribology plays a crucial role in the industry field. Systematic tribology research in Croatia started 40 years ago. The higher education and scientific activities on tribology in Croatia began with the Chair of Materials and Tribology of the Department of Materials at the Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb. Today, this scientific activity in Croatia includes many scientists, and their work was brought together in 1999 by the founding of the Croatian Society for Materials and Tribology (HDMT). This Special Issue aims to show recent tribological research in Croatia on the occasion of the 25th anniversary of the Croatian Society for Materials and Tribology. The topics of interest in this Special Issue include, but are not limited to: Tribological behavior of metallic and non-metallic materials
Wear, including adhesion, abrasion, and tribo-corrosion
Cavitation and erosion
Sub-surface stressing, fatigue spalling, pitting, micro-pitting
Surface topography of substrate and layer
Wear-resistant materials and coatings
Your contribution to this Special Issue is highly appreciated.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
