The 15th Anniversary of *Materials*—Recent Advances in Catalytic Materials

Message from the Guest Editor

Launched in 2008, *Materials* has provided readers with high-quality content edited by active researchers in material science for 15 years, through sustainable open access and outstanding editorial service. Today, the published papers receive more than 1,500,000 views per month, with readers in more than 150 countries and regions. The 15th Anniversary of *Materials* will be celebrated with a Special Issue entitled “Recent Advances in Catalytic Materials”. Papers in any area of catalysis will be considered in this Special Issue. Both homogeneous and heterogeneous catalysis papers are welcome. Manuscripts concerning synthesis, characterization, and applications of catalysts are of interest. Both experimental and computational modeling studies will be included.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
