# Advances in Phase Change Materials: Characterization, Design and Applications

### Message from the Guest Editor

Phase change phenomena exist in many natural materials, such as metals, polymers and oxides, etc. Phase change materials have been widely researched in terms of energy storage, thermal management, smart building, and information storage. Especially in the intelligent photonics fields, various new types of photonic devices have materialized by taking advantage of phase change materials in rapid reversible switching, large variation range of optical dielectric function, and nonvolatile and long-term retention. These devices usually possess reprogrammable, reconfigurable, rewriteable, tunable, and switchable properties. This volume aims to collect the latest developments for scientific and technological advances of the PCMs so as to provide an exhaustive overview of the state of the art and future trends. Topics will include but not be limited to:

- Synthesis and doping engineering;
- Calculation and modeling of transition dynamics;
- New structures, e.g., super-lattice and heterostructure;
- Fundamental and device physics;
- Micro- and nanoscale phase-change devices;
- Metal-insulator transition in VO<sub>2</sub>;
- Phase-change memory.

---

## About the Journal

### Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
