

Special Issue

Advances in Modern Structural Engineering: From Materials to Building Structures

Message from the Guest Editors

This Special Issue aims to capture and disseminate the latest research advancements that are reshaping the building structures. It serves as a platform for experts and scholars to explore the intricate interplay between advancements in materials science and their applications in building structures. It highlights the transformative impact of novel materials, such as high-performance concrete, metals, bio-based materials, and smart materials, on the design, performance, and durability of structures. This Special Issue also focuses on the innovations of building structures, such as fabricated and modular structures, steel structures, composite structures, bio-based structures, etc. The contributions within this Special Issue pave the way for groundbreaking advancements in modern structural engineering, ultimately contributing to the development of safer, more efficient, and environmentally friendly materials and buildings. You may choose our [Joint Special Issue](#) in *Buildings*.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
