Special Issue

Mechanics, Fatigue and Fracture of Metallic Materials (Second Edition)

Message from the Guest Editors

Metallic materials are one of the largest groups used to produce machine components and structures. Moreover, the development of technology enables the creation of new alloys of these materials that also affect their individual characteristics depending on their production method. Therefore, the impact of these features on durability and mechanical strength requires knowledge of the damage mechanisms and their development under static and cyclic loadings. Experimental research allows for understanding the damage mechanism, analyzing it in depth and providing information for computer simulations. The Special Issue is devoted to the development of experimental and theoretical methods of evaluation and a description of the behavior of metallic materials subjected to fatigue loads, including but not limited to the following topics:

- Uniaxial and multiaxial fatigue;
- Damage mechanisms;
- Damage accumulation models;
- Fatigue crack growth;
- Mixed-mode fracture;
- Fatigue life assessment;
- Failure analysis;
- Metal composites.

Guest Editors

Dr. Zbigniew Marciniak
Department of Mechanics and Machine Design, Opole University of Technology, 45-271 Opole, Poland

Dr. Rui F. Martins
Department of Mechanical and Industrial Engineering, NOVA School of Science & Technology, Universidade NOVA de Lisboa, 2829-516 Caparica, Portugal

Deadline for manuscript submissions

closed (20 March 2025)

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
