# Physical and Biochemical Properties, Application and Sustainable Development of Fuel Cells

### Message from the Guest Editors

I invite you to partake in a joint initiative aimed at presenting the possibilities of using fuel cells, including hydrogen technologies, in a broader context. The energy policy of many countries, including EU countries, is almost entirely reliant on hydrogen as a zero-emission energy carrier. Let us join these activities and enrich our knowledge about hydrogen and the wide possibilities of its use in fuel cells. I look forward to our fruitful cooperation.

## About the Journal

### Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
