# Special Issue

## Structural, Mechanical and/or Magnetic Properties of Metallic Materials

## Message from the Guest Editor

This Special Issue features research and review articles on the production of metallic alloys and composites, focusing on studies that analyze their structures and microstructures, as well as their thermal, mechanical, and/or magnetic response characterization (including simulation articles). Articles analyzing the influence of processing techniques (including additive manufacturing) and processing conditions on their structure are welcome. Functional properties are highly dependent on the microstructure and its thermal stability. Apart from the traditional mechanical materials. based on Fe, Co, or Ni, or light alloys, new families of materials, such as high-entropy alloys, have recently been added. With respect to mechanical properties, it is normally hardness, elasticity, and resistance that need to be optimized. Regarding the magnetic properties, their optimization depends largely on their specific applications.

## About the Journal

## Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editor-in-Chief

Prof. Dr. Maryam Tabrizian

 Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
 Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### **Journal Rank:**

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
