

Special Issue

Advances in the Design and Properties of New Ecoconcrete Formulations

Message from the Guest Editors

This Special Issue, entitled “Advances in the design of new eco-concrete formulations and their properties”, aims to address the latest research in the study of recycled concrete with different types of waste and by-products. The main topics included in this Special Issue include, but are not limited to, the following:

- Advances in the study of the characterization of recycled concrete and recycled mixed aggregates;
- New classification of recycled aggregates according to their properties;
- Improvement of properties through different treatments;
- Use of recycled concrete and recycled mixed aggregates in new construction materials;
- New techniques for the study of mechanical properties and durability of different types of recycled construction materials;
- Leaching properties of recycled mixed aggregates and concrete;
- Evaluation of the analysis of the life cycle of the production and use of recycled aggregates.

Guest Editors

Prof. Dr. Francisco Agrela

Dr. Julia Rosales

Dr. Manuel Cabrera Montenegro

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
