

Special Issue

Manufacturing Technology, Materials and Methods (Second Edition)

Message from the Guest Editors

Manufacturing technologies are used in many fields. They are used to achieve production sustainability and cost-effective product manufacturing. The processes, materials, and technologies used, as well as their impact, are important features of the entire production chain. This Special Issue of *Materials* deals with analyses applied using various manufacturing technologies, studies of the phenomena accompanying manufacturing processes, as well as the use of engineering tools. Your contributions could help us to understand and solve the challenges currently facing experts and researchers. Manuscripts should be related to the machining of metals and alloys, cold metal processing, welding, production and analysis of polymers and composites, issues related to the research of tools and tooling systems, surface engineering, coordinate measuring, reverse engineering, and accompanying phenomena manufacturing processes, such as friction and wear. It is our pleasure to invite you to submit a manuscript to this Special Issue of *Materials*. Articles, reviews, and communications are also all welcome.

Guest Editors

Dr. Rafał Gołębski

Faculty of Mechanical Engineering and Computer Science, Department of Technology and Automation, Częstochowa University of Technology, 42-201 Częstochowa, Poland

Prof. Dr. Antun Stoić

Mechanical Engineering Faculty, University of Slavonski Brod, 35000 Slavonski Brod, Croatia

Deadline for manuscript submissions

closed (10 April 2025)

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
