

Special Issue

Advances in Manufacturing and Materials: Additive Manufacturing and High-Performance Alloys

Message from the Guest Editors

We are now inviting submissions for a Special Issue focused on cutting-edge developments in additive manufacturing and high-performance light metal materials. With rising demands for lightweight, high-strength components in aerospace, transport, and machinery, advanced manufacturing technologies and novel material systems are essential. This issue highlights solid-state methods such as stirring friction additive manufacturing, which offer advantages over melt-based techniques, including improved structural integrity, lower deformation, and higher efficiency. To meet extreme performance requirements, innovations in both processes and materials—such as new aluminium alloys and metal matrix composites—are crucial. We welcome original research articles and high-quality reviews on a range of topics, including:

- Recent advances in stirring friction and solid-state additive manufacturing
- Multi-material and hybrid additive manufacturing
- F-SPR/FDS technologies
- Liquid and semi-solid metal forming
- Artificial intelligence in manufacturing process optimization
- Development of aluminium alloys and metal matrix composites

Guest Editors

Dr. Jianyu Li

State Key Laboratory of Advanced Design and Manufacturing Technology for Vehicle, College of Mechanical and Vehicle Engineering, Hunan University, Changsha, China

Prof. Dr. Jinliang Zhang

Mechanical Engineering, Wuhan University of Technology, Wuhan 430070, China

Deadline for manuscript submissions

10 December 2026

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
