

Special Issue

Advanced Superconducting Materials: Design, Properties and Applications

Message from the Guest Editor

Superconductivity is a fundamental phenomenon that has not yet lost the interest it has attracted, leaving room for new experimental discoveries and practical use. New compounds and approaches to obtaining controlled superconductivity are constantly being discovered, which causes the need for fundamental and theoretical studies. This Special Issue is intended to provide an opportunity to review progress in certain areas of superconductivity. Particular attention is paid to experimental and theoretical studies of superconducting materials and their latest applications. Potential topics include but are not limited to:

- High-temperature superconductors;
- Synthesis of superconducting materials;
- Hybrid superconducting/ferromagnetic and superconducting/normal metal materials for engineering thin film properties;
- Applications of low-temperature superconducting materials to design and fabrication of ultimately sensitive bolometers, microcalorimeters, photon counters and quantum information processing, as well as applications to dark matter search.

Guest Editor

Prof. Dr. Andrey Pankratov

THz Spectroscopy Department, Institute for Physics of Microstructures of RAS, Center for Quantum Technologies of NNSTU n.a. R.E. Nizhny Novgorod 603087, Russia

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
