Special Issue

Synthesis and Structure Elucidation of Low-Dimensional Materials

Message from the Guest Editors

Low-dimensional materials have attracted a lot of attention due to their tailorable physical and chemical properties and a wide variety of structures.
With at least one dimension being significantly smaller than the other two, low-dimensional materials consist of zero-dimensional (0D) (nanoparticles, quantum dots), one-dimensional (1D) (nanotubes, nanowires), and two-dimensional (2D) (graphene, TMDC monolayers, nanowalls, nanosheets) materials. With the continuous development of nanotechnology, a broad range of synthesis techniques were demonstrated to synthesise low-dimensional materials, from mechanical exfoliation to solvent-based methods and chemical vapour transport reactions. As the crystal structure and the dimensionality depends heavily on the synthesis method, this Special Issue will focus on the synthesis of novel low-dimensional materials, as well as on the relationship between the synthesis method and the crystal structure.
We cordially invite you to contribute a paper to this Special Issue. Full papers, communications, and reviews are all welcome. Thank you very much in advance for your time and consideration.

Guest Editors

Dr. Luka Pirker

Prof. Dr. Bojana Višić

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
