State-of-the-Art Materials Science and Engineering in Romania 2023

Message from the Guest Editors

It is my pleasure to invite you to submit manuscripts to the Special Issue “State-of-the-Art Materials Science and Engineering in Romania 2023”. The main purpose of this Special Issue is to publish selected, original scientific papers written by Romanian scientists, describing research work carried out on materials using the latest technological advancements. The thematic scope is by no means limited, and we count on interesting and innovative papers contributing to the development of this interdisciplinary area of material scientific and technical research. Let us present research novelties in materials science and increase the visibility of Romanian research potentials in the materials science and engineering field.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
