

Special Issue

Development of Sustainable Asphalt Materials

Message from the Guest Editors

This Special Issue is focused on the sustainable materials developments in asphalt pavements. The articles presented in this Special Issue will cover various topics, ranging from (but not limited to) the optimization of anti-icing, RAP, RAS, crumb rubber, and waste plastic materials, among others.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
