

Special Issue

Advances in Efficient Utilization of Metallurgical Solid Waste

Message from the Guest Editor

Metal is an important raw material in various areas of society, and metal extraction industry (metallurgy) inevitably produces a large amount of metallurgical solid waste. To this end, this Special Issue will provide a platform for scientists and technicians from around the world to share new ideas, methods and technologies for the recovery of valuable components and the high-value utilization of metallurgical solid waste from many metallurgical wastes. Original research and critical articles are welcome in this Special Issue. Potential research subjects include, but are not limited to, the following:

- New methods for and advances in accurately characterizing the chemistry and structure of trace valuable components in metallurgical solid waste;
- New theories and methods for the efficient extraction of trace valuable components from metallurgical solid waste;
- New reagents, technologies or equipment for separating critical metals from metallurgical solid waste;
- The impacts of toxic substances in metallurgical solid waste on the environment and the possible environmental problems caused by waste treatment.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
