

Special Issue

Advanced Textile Materials: Design, Properties and Applications

Message from the Guest Editors

Advanced textile materials have become increasingly important due to attributed high performance and functions, including smart wearable products, functional engineering fabrics, intelligent composite fabrics, biomedical fabrics, etc. The nature of advanced textile materials is the design and assembly of structures and micro/nano materials, in which the multiscale structures ranges from micro-scale, meso-scale to macroscopic constructions, and material performance consists of physical, chemical and biological properties. The topics of interest in which we aim to collect recent academic achievements in this Special Issue cover (but are not restricted to): high-performance textiles, structure design and enhanced property of textile materials; characterization and evaluation methods of textile materials; modelling and simulation methods for the property analysis of textile materials; advanced manufacturing and intelligent processing for textile materials, functional and smart textiles, spacer fabrics, auxetic textiles, textile-based nanocomposites, fiber-based structural materials and textiles for diverse application.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
