

Special Issue

Advanced Progress in the Morphology and Surface of Dental Implant

Message from the Guest Editors

Dental Implantology has become a common method to treat full and partial edentulism. The surface topography, chemical–physical, and chemical properties of dental implants play a pivotal role in the healing process and in speeding up final restorations and functional loading even in sites with poor bone quality and patients with unbalanced healthy conditions. This Special Issue on “**Advanced Progress in the Morphology and Surface of Dental Implants**” will address advances in fixture macro-morphology, fabrication technologies, models for implant manufacturing, and the effect of surface micro-topography on cell responses, protein adsorption, and/or antimicrobial properties. The Special Issue is focused on the emerging concepts on the role of fixture macro-morphology and surface chemistry, topographical patterns at the micro- and nano-scale, addressing fast and successful osseo- and soft tissue integration. Studies on surface micro- and macro-morphology, surface functionalization, and chemical and mechanical properties and their related effects on cells responses and on clinical outcomes are welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
