

Special Issue

Biodegradation or Biodeterioration of Non- metallic Materials

Message from the Guest Editor

The Special Issue is on the **Biodeterioration and Biodegradation of Non-Metallic Materials** including textiles, wood, leather, rubber, paper, building and finishing materials, glass, fuels, and other technical materials. The articles presented in this Special Issue will cover various topics, ranging from microbial biodiversity, factors and mechanisms of biodeterioration, as well as methods of protection against these processes—the use of chemical methods and physical modification of materials; disinfection, with particular emphasis on the impact of methods on the material properties. This Special Issue welcomes contributions from all researchers working on the biodeterioration and biodegradation of technical materials and materials processing to obtain special antimicrobial properties. It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are welcome. Prof. dr hab. Beata Gutarowska

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
