

## Special Issue

# Carbon-Related Materials for Bioengineering

### Message from the Guest Editor

I am very pleased to invite you to submit your work to the Special Issue on “Carbon-Related Materials for Bioengineering”. Despite the novelty of carbon-related materials, they have significantly influenced the landscape of bioengineering by providing a much-improved effectiveness and economically feasible alternatives for the current solutions in several areas of the field. This Special Issue aims to bring together leading researchers to exchange and share their findings for the development of carbon-based products. Themes to be investigated may include but are not limited to:

- Carbon-related materials development;
- Carbon-related materials characterization;
- Implantable devices, drug delivery systems, bionanotechnology, and tissue engineering based on carbon materials;
- Carbon-related material composites for industrial applications based on commercial demand;
- Computer-aided design and investigation of carbon-related materials;
- Carbon-related materials for biosensing devices.

---

### Guest Editor

Prof. Dr. Mariana Ionita

Advanced Polymer Materials Group, University Politehnica of Bucharest, Calea Victoriei 147, 010737 Bucharest, Romania

## About the Journal

### Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q2 (Condensed Matter Physics)
