

Special Issue

Dental Materials and Devices

Message from the Guest Editor

The aim of this Special Issue is to provide the latest information on dental materials, especially in polymeric and composite materials, dental alloys, titanium and titanium-based alloys used for prosthetics, restorative and implant dentistry, and devices such as machining and 3D-printing in dentistry. Topics in this Special Issue include, but are not limited to: the development of dental materials and their mechanical properties and surface properties; the method of material design for improving biological and mechanical properties; the evaluation of mechanical and biological properties of machined and 3D-printed materials; and performance evaluation of machining and 3D-printing devices. Original articles in vitro and in vivo, clinical studies, case reports, communications and reviews are all welcome. Prof. Dr. Hong Guang

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
