

Special Issue

Selected papers from EUROMAT 2017 Conference— Biomaterials

Message from the Guest Editors

This Special Issue will publish papers of authors who presented at the symposia F1, F4 and F5 at the European Congress and Exhibition on Advanced Materials and Processes (EUROMAT 2017) held in Thessaloniki, Greece, 17–22 September, 2017. Papers in the following three main topics will be considered in this Special Issue:

- Biomaterials for tissue engineering;
- Next generation of implants with multifunctional properties: Advanced synthesis, processing and surface modification methods for biomaterials;
- Translation of biomaterials research towards innovation and product development: From concepts to clinic.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
