Feature Papers in "Metals and Alloys" Section

Message from the Guest Editors

We are pleased to announce the Special Issue entitled "Feature Papers in the Metals and Alloys Section". This collection aims to collect state-of-the-art research work or comprehensive review papers in the field of metal and alloy science, as well as advances in engineering technology and innovative applications—especially those topics on the intelligent design or manufacturing processing for high-performance alloys and their components. All articles published in this Special Issue are subject to careful editorial selection. We intend for this Issue to be a good forum for disseminating excellent research findings as well as sharing innovative ideas in the field.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
