Special Issue

Hydrogel Biomaterials: Present and Future Challenges

Message from the Guest Editor

Hydrogels are outstanding biomaterials that resemble the key physiological characteristics of natural extracellular matrices. They have great advantages when it comes to exploiting biomolecules such as nucleic acids, proteins, and cells, and many studies have been achieved to utilize the features. Still, novel hydrogel materials are being synthesized, and various process technologies are being used to fabricate functional hydrogels. Hydrogels are used as biomaterials for mechanobiology controlling cellular fate control. They are also used in the biomedical field, such as in tissue engineering, drug delivery, and biosensors, expanding into clinical applications. Researchers have been developing novel hydrogel materials, and advanced hydrogel materials will be widely used in the future.

It is our pleasure to invite you to submit review articles, original papers, and communications for this Special Issue, “Hydrogel Biomaterials: Present and Future Challenges”.

Guest Editor

Dr. Hyun Jong Lee

Department of Chemical, Biological and Battery Engineering, Gachon University, Seongnam-si 13120, Gyeonggi-do, Republic of Korea

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
