

Special Issue

The 15th Anniversary of *Materials*—Recent Advances in Biomaterials

Message from the Guest Editor

On the occasion of the fifteenth anniversary of *Materials*, the Biomaterials section presents a new Special Issue dedicated to new biomaterials, new biomedical applications of materials used in the human body, and new shaping and characterization techniques. The Biomaterials section is proud to contribute to this anniversary, and, remembering the path taken by *Materials*, we now look to the future. Topics of interest for this Special Issue include new metal alloys with improved properties for specific applications; new ceramics with osteoinductive and bactericidal properties, zirconia-based ceramics with improved toughness, ceramic materials with improved aesthetic properties for the dental sector; new biofunctionalized and degradable bacteriostatic polymers with improved mechanical properties; composite materials with nanomaterial reinforcement particles which are biodegradable, with the optimized orientation of the reinforcement fibers; new material forming methods, improved laser technologies, protrusion systems, directional solidification, 3D printing, and bioprinters. Also, new detection and analysis techniques to determine the properties of biomaterials are also of interest.

Guest Editor

Prof. Dr. Javier Gil

Bioinspired Oral Biomaterials and Interfaces (BOBI), Department of Materials Science and Engineering, UPC, Universitat Politècnica de Catalunya-Barcelona Tech, 08019 Barcelona, Spain

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
