

Special Issue

Magnetic Nanomaterials

Message from the Guest Editor

This Special Issue is open to articles (reviews or original manuscripts) dealing with every aspect related to the creation and study, both experimental and theoretical, of magnetic nanomaterials. Particularly welcome are research works on innovative magnetic nanomaterials studied through an interdisciplinary approach and/or intended to be used in an interdisciplinary context.

Keywords

- Thin films and multilayers
- Dots and nanopatterned structures
- Nanoparticles and ferrofluids
- Nanocomposites and nanoalloys
- Hybrid (bio)-materials
- Biomimetic systems

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
