

## Special Issue

# Materials under High Pressure

### Message from the Guest Editors

Materials experience a series of interesting changes under extreme high pressure, including flow, plastic deformation, phase transformation, fracture, temperature rise and chemical reactions. High pressure can be generated by die compression, high-velocity impact or explosions. This Special Issue 'Materials under high pressure' will focus on the recent research findings on high pressure-related problems in all types of materials. The main topics to be covered include processing technology, state-of-the-art characterization, testing, theoretic modeling and simulation. We welcome the submission of communications, original research papers and reviews on the following, or related, topics:

- material flow mechanism under high pressure;
- microstructural evolution;
- severe plastic deformation;
- high-velocity impact;
- materials or structures under explosion;
- impact-initiated chemical reactions.

---

### Guest Editors

Dr. Chuanting Wang

Prof. Dr. Yong He

Dr. Yuanfeng Zheng

Dr. Xiaoguang Qiao

Prof. Dr. Wenhui Tang

Prof. Dr. Shuhai Zhang

## About the Journal

### Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
