Special Issue

Materials Thermal Behavior during Laser or Electron Beam Irradiation

Message from the Guest Editors

We propose a Special Issue on materials' thermal behavior under laser and/or electron beam irradiation, with a special emphasis on applications, mathematical models, and the impact on social and engineering fields.

Two centuries on since the discovery of the first heat equation by Fourier, the subject continues to be of vivid interest. New models describing laser–matter thermal phenomena have been developed, such as: i) micro/nanoscale heat transfer during ultrashort laser irradiation of materials, ii) ultrafast melting and re-solidification, iii) two temperature models with extensions, or iv) non-Fourier models with consideration of relaxation times, as well as, possibly, vaporization and plasma generation.

Materials to be considered with this Special Issue extend from metals to ceramics and biomaterials, either from an experimental or analytical/numerical simulations approach. Relevant examples of laser versus e-beam irradiation such as polymers, biopolymers, elastomers, hydrogels, starch, food, and so on and similar ones are very much welcomed.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
