

## Special Issue

# Materials under Pressure

### Message from the Guest Editors

Pressure, like temperature, is one of the fundamental thermodynamic variables. High-pressure research has been advancing in recent decades with the development of various high-pressure instruments and probing techniques using synchrotron radiation light sources. Recent high-pressure research has shed a new light on condensed matter physics, chemistry, and materials science, including high T<sub>c</sub> superconductors, exotic metals, pressure-induced transition, auxetic materials, molecular storage of transmitting media, dislocation and grain rotation of nanomaterials, etc. Studies on pressure dimension are rapidly expanding and providing challengeable and potential issues of science and technology. The upcoming Special Issue, entitled "Materials under High Pressure", aims to present diverse fields, including 1) experimental, theoretical, and computational research of material physics, chemistry, and application, and 2) synchrotron-based technical approaches and others.

---

### Guest Editors

Dr. Yongmoon Lee

Department of Geological Sciences, Pusan National University, Busan 46241, Republic of Korea

Prof. Dr. Donghoon Seung

Department of Earth Systems and Environmental Sciences, Chonnam National University, Gwangju, Korea

---

### Deadline for manuscript submissions

closed (17 February 2022)

## About the Journal

### Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
