

Special Issue

Advances in Metallic Glass Matrix Composites

Message from the Guest Editor

The objective of the Special Issue is to attract contributions that combine modeling approaches with experimental works. The contribution should give a comprehensive description of the phenomena occurring in the metallic glass matrix composite (MGC). The ultimate goal is to provide useful insights into the structure–property relationships of MGCs and clarify different aspects that are observed empirically in both experiments and simulations. Keywords:

- metallic glass composites;
- atomistic simulations;
- finite element simulations;
- microstructure;
- deformation;
- plasticity;
- shear bands;
- crystalline precipitates in metallic glass;
- work hardening;
- martensitic phase transformation.

Guest Editor

Dr. Daniel Şopu

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
