Multiobjective Design Optimization of Sandwich- Structured Composites and Their Mechanical Properties

Message from the Guest Editor

Theoretical, numerical, and experimental works related to a multiobjective optimization and design of composite materials mainly influenced by mechanical properties are solicited. Micro- as well as macro-sandwich structures approaches are within the scope of the Special Issue.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
