

## Special Issue

# Nanomaterials for Drug Delivery

### Message from the Guest Editors

Within this Special Issue “Nanomaterials for Drug Delivery”, we invite members of academic and scientific communities to contribute their latest findings on nanosized and nanostructured biomaterials intended for new pharmaceutically-active formulations. We are especially looking for relevant studies and reports on organic macromolecules (natural and synthetic polymers, membranes and films, scaffolds and gels), carbonaceous materials (single and multiwalled carbon nanotubes, fullerenes, graphene and graphene oxide), oxides (nanoparticles, micro- and mesoporous materials), metal nanostructures (noble metal nanoparticles, quantum dots), and composite materials.
