

## Special Issue

# New Insights into Dental Implants

### Message from the Guest Editor

Implant dentistry continues to offer valuable opportunities to identify innovative research ideas that help us to better understand the healing processes and improve our clinical treatments. The present Special Issue aims to collect articles that deal with new surfaces, creative implant conformations, and original abutment/implant units, aiming to improve hard and soft tissue healing. I hope that submitting your novelties in the fields indicated above to the present Special Issue will be of interest to you. Kind regards,

---
