Renewable Energy and E-mobility

Message from the Guest Editors

The international conference on Renewable Energy and E-Mobility (ICREEM2022) is a Biennial event organised by the World Engineering, Science and Technology Congress (ESTCON). It is an avenue for knowledge-sharing, intellectual discourse, and networking on scientific and engineering research focused on sustainable energy systems. The conference theme is Gearing Innovations in Renewable Energy Towards Green and Sustainable Mobility, and it includes the topics of solar and thermal energy, green electric mobility, advanced simulation, system integration, cloud computing, big data analysis, IoT, additive manufacturing, and smart factories.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
