Special Issue

Polymeric Nanocomposites for Flexible Sensor

Message from the Guest Editor

Polymeric nanocomposites are currently an area of increasing scientific as well as technical interest. Polymeric nanocomposites can be synthesized for various applications by the proper selection of the matrix, nano-reinforcement material, synthesis method and surface modification of either the reinforcement or polymer. This Special Issue invites original papers and reviews reporting on recent progress in the following areas:

- Fabrication methods of the polymeric nanocomposites for flexible sensors;
- Chemical and physical surface modification of polymeric nanocomposites to improve sensing performance;
- Next-generation polymeric-nanocomposite-based flexible sensors;
- Integration process of polymeric-nanocomposite-based biosensors into smart devices and their point-of-care testing;
- Properties of polymeric-nanocomposite-based biosensors;
- Biological properties of polymeric-nanocomposite-based biosensors.

Guest Editor

Dr. Chang-Soo Lee

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
