

Special Issue

Mechanical Properties and Structures of High-Performance Polymer Composites and Metal Alloys Processed by Additive Manufacturing Technologies

Message from the Guest Editors

This Special Issue welcomes original research contributions and review articles highlighting advances and future directions in the field of additive manufacturing (AM) of Polymer-Based Composites and Metal alloys. It will publish cutting-edge original research and review papers on the latest advances in new polymeric composite systems. The main scope of this Special Issue is to gather scientific expertise from all fields covering mainly mechanical properties and structural analysis of additively manufactured elements. The Special Issue is dedicated to a wide range of applications. New AM technologies based on material extrusion, binder jetting, selective curing/sintering, multi-material printing and in-situ and post-processing techniques to improve part strength and structure–property relationships are also covered. Contributions that also report on part characterization, the effect of process parameters on mechanical and geometric performance, application of the produced parts, new developments in CAGD (computer-aided geometric design) to generate optimized trajectories of AM technologies with improved accuracy or post-processing techniques, are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
