

Special Issue

Advances in Biomass-Based Materials and Their Applications (2nd Edition)

Message from the Guest Editor

As the world faces a turning point where oil-based products need to find effective replacements, new strategies, in line with the UN 2030 Agenda for Sustainable Development, must be pursued. Biomass-based materials, which are, at their essence, products originating from renewable organic material, can provide an important contribution towards this goal. This Special Issue in *Materials*, “Advances in Biomass-Based Materials and Their Applications”, intends to assemble manuscripts regarding safe and sustainable-by-design biomaterials, presenting innovative new methods, production routes, or breakthroughs regarding the characterization and applications of biomass-based materials such as—but not restricted to—additives, building blocks, biochemicals, biopolymers, catalysts, food packaging materials, sorbents, building materials, and high end-value bioproducts for the medical, pharmaceutical, and cosmetics markets. We thus invite you to submit your research in this field in the form of original research papers, reviews, or short communications.

Guest Editor

Dr. Catarina Dias de Almeida

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
