Special Issue

Research Progress of the Fatigue, Crack and Failure Mechanisms of Materials and Structures

Message from the Guest Editors

In recent years, significant advancements have been made in the study of fatigue, crack formation, and failure mechanisms in various materials and structures. Understanding these failure mechanisms is crucial to ensure the safety and longevity of structures and to develop more reliable materials for a wide range of applications. The exploration of failure mechanisms encompasses a diverse array of materials and structures, including metals, polymers, ceramics, composites, and biological tissues. The failure mechanisms encountered in various materials and structures encompass a broad range of phenomena. These include fatigue, corrosion, creep, brittle fracture, material degradation, and other complex processes. Through extensive research and experimentation, researchers have gained a deeper understanding of these mechanisms, leading to the development of innovative materials and structures. We invite researchers and practitioners from various disciplines to contribute their expertise and insights to further enhance our understanding in these areas.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
