# **Special Issue**

### Numerical Simulations in Metal Refining Process

#### Message from the Guest Editor

With the increasing demand for high-quality metals, it is necessary to improve the refining process to improve its efficiency, stability, and lower its carbon to enhance smelter competitiveness. With the development of numerical techniques and computational resources, the computational fluid dynamics (CFD) method has become a powerful tool for understanding the metal refining process, able to solve the coupled mass, momentum, and heat transfer equations and allowing for a more realistic assessment of the flow field. Therefore, the purpose of this Special Issue is to collect and display the latest research progress of the numerical simulation of the metal refining process, as well as identify any research gaps.

This Special Issue of Materials aims to advance the current knowledge in numerical studies concerning the multiphase flow, inclusion motion, bubble coalescence and breakup, the and chemical reaction in various metal refining processes, especially welcoming research papers addressing the innovative numerical approach. The journal accepts original research papers as well as review articles summarizing recent progress in the field.

## About the Journal

#### Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

#### Editor-in-Chief

#### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada 2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

#### Author Benefits

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
