

Special Issue

Smart Biomaterial Functionalization for Applications in Nanomedicine

Message from the Guest Editor

You are invited to contribute to this Special Issue on “Smart Biomaterial Functionalization for Applications in Nanomedicine”. Smart biocompatible materials find application in a wide range of nanomedicine fields: (a) Drug delivery nanosystems, (b) diagnostic nanosystems, and (c) artificial extracellular matrices for regenerative medicine and cell microenvironment studies. The design of new functionalization and crosslinking strategies has a huge impact in the development of new multifunctional materials today. The aim of this Special Issue is to collect original papers and review articles to present the recent advances in functionalization and activation strategies of new smart bio- and nanomaterials.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
