Special Issue

Surface Treatment for High-Entropy Alloys

Message from the Guest Editors

Recently, high-entropy alloys (HEAs) have aroused growing interest in the scientific community. Yet, although the bulk properties of some HEAs are good, their surface properties may be insufficient. Surface properties are very important for a wide variety of advanced industrial applications, especially in areas where surface performance is important, such as tribology-, corrosion-, and oxidation-resistance properties. Thus, the focus has recently turned to the surface properties of HEAs. Within this context, we would like to invite you to submit your manuscript(s) to *Materials* for the Special Issue on Surface Treatment for High-Entropy Alloys. The scope of this Special Issue includes various traditional and advanced surface treatment methods applied to HEAs (thermo-chemical surface treatment methods, boronizing, nitriding, carburizing, aluminizing, siliciding, thermal spray, sputter deposition, micro-arc oxidation, laser surface melting, laser/plasma cladding, shot/sand blasting, friction stir welding).

Guest Editors

Prof. Dr. Thomas Lampke

Chair of Materials and Surface Engineering, Chemnitz University of Technology, Chemnitz, Germany

Dr. Sezgin Cengiz

1. Division of Microstructure Physics, Department of Physics, Chalmers University of Technology, SE-412 96 Göteborg, Sweden
2. Material Science and Engineering, Gebze Technical University, 41400 Gebze, Kocaeli, Turkey

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
