# Dissimilar Materials Brazing and Diffusion Bonding

# Message from the Guest Editor

Compared with fusion welding, brazing and diffusion bonding have the evident advantages of promoting the structural adaptability, welding deformation and dimensional accuracy of welds. Therefore, dissimilar materials brazing and diffusion bonding have been extensively employed in aerospace, automobile manufacturing, nuclear power facilities and other fields. During the brazing and diffusion bonding process, the microstructure evolution behavior of the bonding interface and bonding layer is directly related to the performance of the joints, and has received extensive attention. The aim of this Special Issue is to introduce the latest advances in dissimilar materials brazing and diffusion bonding, including bonding materials design, parameter control, microstructure and property characterization, failure behavior analysis, and nondestructive testing and evaluation. Experimental and numerical modelling/simulation studies on all relevant aspects of this multidisciplinary subject are welcome. We look forward to your contributions to this Special Issue.

# About the Journal

# Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Editor-in-Chief

Prof. Dr. Maryam Tabrizian

 Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
 Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

# **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### **Journal Rank:**

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
