

## Special Issue

# Advanced Superconducting Materials and Technology

### Message from the Guest Editors

The rapid development of technology observed in recent decades poses increasingly difficult challenges in the field of modern materials. Superconducting materials, especially high-temperature ones, are among the key materials for the development of modern energy industry, transport, and medicine. Hence, there is a constant search for new solutions in new, high-temperature materials through theoretical modeling and experimental work. Moreover, some materials are already so technologically mature, or will soon be, that they create the possibility of breakthroughs in many fields, from quantum computers to nuclear fusion technology. In this Special Issue, we provide a venue for presenting both theoretical and experimental research results in the field of superconducting materials, as well as reports on technological achievements using superconductivity. Full articles, short communications, and review papers are welcome for submission.

### Guest Editors

Prof. Dr. Tomasz Czujko

Department of Advanced Materials and Technologies, Faculty of Advanced Technologies and Chemistry, Military University of Technology, Gen. S. Kaliskiego 2, 00-908 Warsaw, Poland

Dr. Daniel Gajda

Division of Low Temperature and Superconductivity, Institute of Low Temperature and Structure Research, Polish Academy of Sciences, 50-422 Wrocław, Poland

### Deadline for manuscript submissions

30 May 2026

## About the Journal

### Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
