Special Issue

Advances in Adhesion Science, Materials and Technology

Message from the Guest Editors

Adhesion plays a key role in nature and artificial applications, spanning from atomistic to macroscopic scales. The study and design of adhesive systems is complex, since adhesion is affected by several factors, such as surface roughness, bulk material and interfacial properties, material ageing, loading conditions and contact geometry. This Special Issue aims to collect recent contributions from scientists working on basic and applied research on adhesion. Our goal is to highlight the most recent advances in the modeling, experimentation, and technology of adhesive systems across various length scales. Contributions are welcome on, but are not strictly limited to, the following topics:
Strategies for tuning adhesion; Bio-inspired adhesive systems;
Design of structural and/or reversible adhesive systems;
Haptic adhesion;
Adhesion in biomedical applications;
Adhesion contact mechanics;
Peeling and fracture mechanics;
Artificial Intelligence strategies applied to adhesion;
Soft and hard matter adhesion;
Interplay of adhesion and friction;
Pick-up and place tools;
Soft adhesive grippers;
Innovative adhesive materials;
Experimental measurements of adhesion.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
