

Special Issue

Electronic Structure of Advanced Functional Materials

Message from the Guest Editor

The Special Issue is divided into two parts: part I reviews the fundamental principles of the electronic structure of materials, while part II presents more specialized topics such as electronic structure analysis methods, band structure calculations of various functional materials, and the application of these materials in various fields. In Part I, articles discuss theoretical approaches to understanding an electronic structure, such as density functional theory (DFT). Other topics covered include related concepts such as chemical bonding, molecular shape and symmetry, electron–phonon interactions, and other aspects of quantum chemistry. Part II includes applications of electronic structure analysis methods to various materials such as perovskites, kaolinite, hectorite, barium titanate, and ferroelectric materials. In addition, the charge transport mechanism of organic–inorganic hybrid materials for optoelectronic devices is discussed. Moreover, future directions of research regarding advanced materials in photonics, spintronics, topological materials, and water splitting are highlighted.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
