Nanomaterials and Materials for Translational Research

Message from the Guest Editors

We are proud to announce this Special Issue, “Nanomaterials and Materials for Translational Research”, in *Materials* (MDPI Editorial; IF: 2.654) devoted to the 3rd International Symposium on Nanoparticles, Nanomaterials and Applications (3rdISN2A-2018). The conference will be held in Costa de Caparica, Portugal, 22–25 January, 2018. This Special Issue will select excellent papers from the oral (plenary, keynotes, and regular talks) and posters participations, and covers a very wide range of fields in materials and nanomaterials applied in translational research, focusing in environmental, toxicological, and bio-medical applications. We invite investigators to contribute original research articles, as well as review articles, to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
