Trends in Materials for Cosmetic Formulations

Message from the Guest Editor

Cosmetics are widely used around the world. The basic materials required for cosmetic preparations are oily materials such as oils, fats, wax esters, and ester oils. Surface-active agents are employed as emulsifiers, solubilizing agents, etc. In cosmetic formulations, polymers and biopolymers are also used as thickeners and film formers. In addition, there are new trends in cosmetic formulations, which depend on the local market of raw cosmetic materials. Cosmetics are essential in everyday life because they may influence human health and well-being. The main topics of the Special Issue will cover the trends in materials for cosmetic formulations. Novel material ideas for cosmetic chemistry and cosmetology will be highly expected. In particular, ideas that consider waste reduction and sustainability are strongly encouraged.

Guest Editor

Prof. Dr. Alina Sionkowska

Department of Biomaterials and Cosmetic Chemistry, Nicolaus Copernicus University in Torun, 87-100 Torun, Poland

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
